# **Enjoying already?**

## ***Or still carrying..!?***

Find out, why more and more citizen are convinced by our concept and why they use our high-quality products in their households

# Water must be good!

The water-departments are testing our water by just a few substances. Tapwater and bottled water have something similar:

They can be burdened with substances, which should not be in drinking water, the most important food: waterlouses, their dung or cadaver; lead, copper, asbestos from asbestos-cement water pipelines (which are nearly everywhere) as well as medicaments, hormones, radioactive isotopes or an amount of cancerogene ingredients or arsen, cadmium, chlorine, herbicides, uran, nickel, nitrates, parasites, quicksilver etc...

## The good News:

To let water taste good again, being bio-available and help for wellbeing, it should be uncontaminated and clean. Therefore we use a well established technology, which at that time was developed by NASA for space travel and today it is useful for us and even in our kitchen available.

*So we have created with our **WALOSA Filtersystem** a good idea for your **Life-Quality**.*

Experience the quality of the water and the equipment at different health- and lifestyle exhibitions (schedule at [www.walosa.de](http://www.walosa.de)) or directly by the person, who gave this flyer to you.

## The concept:

Similar to a „mobile phone-contract“ we give the expensive product without investment of the customer away.

For the monthly arising expenses we charge anyhow LESS than you average actually pay every month for mineralwater. Pursuant to investigations a citizen pays for a „cheap water“ about 13 till 16 EURO per month. If someone attach importance to a higher value of mineralwater, there will be paid 35 till over 50 EURO per month.

If you suppose a 2-person-household, the outcome is an average of about **45 EURO** cost per month for water.

Here we split the difference with a **IMMEDIATELY saving** of **17,-EURO** !

**Our „water-flatrate“** costs even just **28,- EURO** per month.

The complete equipment is thereby already **INCLUSIVE**!

Take your dwell into your house and forget unpleasant carrying of heavy water-boxes!

**Live healthier, attractive, favourable!**
